

HOLLYWOOD SPECIAL EFFECTS WITHOUT THE MOVIE STAR PRICE TAG

You don't use a typewriter anymore do you? Then why are you relying on boring wall charts, cheesy pamphlets, and clumsy vertebral models for your patient education?
Chiroglyphix is patient education software that uses 3D animations to help you teach prospective and current patients about their conditions.

CHIROGLYPHIX PATIENT EDUCATION SOFTWARE:

- Nearly 500 animations and stretching/exercise images
- Pause and draw directly on animations
- Create custom playlists to play multiple animations in a row
- Ability to create a personalized waiting room "movie"
- Store images per patient file and print images for patients
- Works on desktop pcs, laptops, tablet pcs, and pen tablets
